Professional Summary

Backend-focused Node.js Developer with 3.5+ years of experience engineering high-performance RESTful APIs, distributed queue architectures, and database systems. Experienced in building multi-chain crypto token exchange platforms, geospatial community networks, and server-side image processing pipelines using Node.js, Express, TypeScript, PostgreSQL (Drizzle ORM), MongoDB, Redis, BullMQ, and Docker.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Backend Frameworks: Node.js, Express.js, RESTful APIs, Microservices, BullMQ, WebSockets
Databases & ORM: PostgreSQL, MongoDB ($geoNear Indexing), Redis, Drizzle ORM, Sequelize, Mongoose
DevOps & Tools: Docker, Git, Postman, Linux CLI, Sharp, Node-Canvas, Cloudinary
Third-Party APIs & Webhooks: QuickNode, Alchemy, Binance API, Stripe, PayPal, Push Notifications (FCM), WhatsApp Web API

Professional Experience

Incipient Infotech Ahmedabad, Gujarat
Node.js Developer *Aug 2024 – Present*
- Architect and maintain scalable backend microservices and RESTful APIs using **Node.js**, **Express**, and **TypeScript**, containerized with **Docker**.
- Implement distributed task queues with **BullMQ** and **Redis** for asynchronous job execution, transactional notifications, and scheduled workflows.
- Design resilient data layers utilizing **PostgreSQL** with **Drizzle ORM** for type-safe transactions, and **MongoDB** for document collections.
- Integrate Web3 RPCs and payment webhooks (**Stripe**, **PayPal**, **QuickNode**, **Alchemy**) with short-term caching to ensure idempotent processing.

QuadB Technologies Remote (Ludhiana, Punjab)
Node.js Developer (Full-time & Intern) *May 2023 – Jun 2024*
- Engineered backend microservices for **OWR E-commerce**, a multi-vendor platform featuring storefront customization and catalog management.
- Designed multi-tenant relational schemas using **PostgreSQL** and **Sequelize ORM**, utilizing **Redis** caching to optimize read-heavy endpoints.
- Integrated logistics APIs (**Shiprocket**, **Delhivery**) for automated shipping label dispatch, and authored automated test suites with **Mocha**, **Chai**, and **Zod**.

Key Production Projects

ProjectWolf | *PostgreSQL, Drizzle ORM, Node.js, React, Alchemy, QuickNode, Binance API* | projectwolf.com *2025 – 2026*
- Engineered multi-chain crypto presale backend enabling users to swap ETH, SOL, and BNB for WOLF tokens across scheduled time-based rounds.
- Integrated Alchemy/QuickNode webhooks for on-chain verification, Drizzle ORM for atomic transactions, and Binance API with 15s TTL cache.

ShareThere | *Node.js, Express, MongoDB ($geoNear), Stripe, PayPal, React* | sharethere.com *2024 – 2025*
- Architected location-based community feed utilizing MongoDB **$geoNear** aggregation with 3-tier radial proximity metrics and pagination.
- Integrated **Stripe Webhooks** for subscriptions and **PayPal Webhooks** for donations with automated status synchronization.

FaceWish | *Node.js, Express, Sharp, Node-Canvas, REST APIs* | facewish.com *2025 – 2026*
- Built server-side composite image rendering pipeline using **Sharp** and **Canvas** to blend user facial features into greeting templates.
- Developed REST endpoints processing dynamic sticker transforms, layered background swapping, and instant high-resolution rendering.

Education

Hasmukh Goswami College of Engineering Ahmedabad, Gujarat
Bachelor of Engineering in Mechanical Engineering *2014 – 2018*
